**Queries and muting (simple)**

click the **triangles** to expand and collapse

This is your dashboard for queries.  
Find the queries ordered by organization, then project, then user.  
Then act: preview, mute, generate a link, edit, go to the results page.

**full text search**  
on organization,  
project, people  
and queries

use *checkboxes* to **mute**  
queries, so that they do not  
show up in the sidebar

**go to** the page of this query to edit and run it

quickly expand/  
collapse the tree  
to a specific level

your mutings are not  
stored on the server but  
on your browser

**preview/edit** the description of this query  
right here by clicking the info icon

The screenshot shows the SHEBANQ web application. The top navigation bar includes links for Home, The Text, Words, Queries, Help, News, and Sources, along with a Log In button. On the left, there is a sidebar with a filter section (simple/advanced, Filter, dirk, filter applied, all with children (2), in my queries, clear filter) and a level section (Level, organizations (0 1), projects (0 2), users (2 0), queries (9), manual). The main content area displays a tree of Public Queries, with 'Double imperatives' selected and highlighted in yellow. Annotations with yellow arrows point to various elements: 'Queries and muting (simple)' points to the sidebar; 'click the triangles to expand and collapse' points to the tree structure; 'full text search on organization, project, people and queries' points to the filter input; 'quickly expand/collapse the tree to a specific level' points to the level section; 'use checkboxes to mute queries' points to the checkboxes in the tree; 'your mutings are not stored on the server but on your browser' points to the tree; 'This is your dashboard for queries...' points to the overall interface; 'go to the page of this query to edit and run it' points to the 'Double imperatives' entry; 'preview/edit the description of this query right here by clicking the info icon' points to the info icon next to 'Double imperatives'; 'generate a pretty hyperlink to this query to be used in the description of an other query' points to the link icon next to 'Double imperatives'; and 'pretty means: mark-down. This description has been entered in mark-down.' points to the description text of the 'Double imperatives' query.

**Double imperatives**  
DANS shebanq

**Finding the right contexts**  
This is a variation on Reinoud Oosting: Repetition of imperative in Isa 40:1 which provides the context **book** for two consecutive clauses.  
This query takes **verse** instead.  
N.B. Use *data* view to inspect the structural difference between Jesaia 40:1 and Jesaia 51:9  
Done

## Queries and muting (advanced)

**full text search** on organization, project, people and queries. The meaning of the numbers are explained in other boxes.

without a filter, you can quickly select your own queries and your unpublished queries

# queries/matches in the levels. The **bold** number indicates real matches, the grey number indicates how many items there are with a match in its subtree

simple **advanced**

### Filter

no filter applied

all matches

all with children

in all queries

in my queries

in private queries

### Level

organizations (10)

projects (20)

users (41)

queries (338)

**manual**

total # queries in this sub tree

**total** # queries of this organization, project or user

# of queries that are **up-to-date**, **have never run**, have **outdated results**

The screenshot shows a hierarchical tree of queries. Annotations with yellow arrows point to specific parts of the interface:

- An arrow points from the 'total # queries in this sub tree' box to the 'Public Queries' entry, which shows a calculation:  $240 + 1 + 97 = 338$ .
- An arrow points from the 'total # queries of this organization, project or user' box to the 'DANS' entry, which shows a calculation:  $13 + 1 = 14$ .
- An arrow points from the '# of queries that are up-to-date, have never run, have outdated results' box to the 'shebanq' entry, which shows a calculation:  $11 + 1 = 12$  of **20**.
- An arrow points from the 'if logged in you can add/edit orgs, projects, queries here' box to the 'Dirk Roorda' entry, which shows a calculation:  $11 + 1 = 12$  of **14**.
- An arrow points from the 'my queries are bold, and if they are private they are italic too' box to the 'testOliver' entry, which is bold and italicized.

The tree structure is as follows:

- Public Queries ( $240 + 1 + 97 = 338$ ) +
  - Projects without Query ( $= 0$ ) +
  - DANS ( $13 + 1 = 14$ ) +
    - Test Projects ( $2 + 1 = 3$ ) +
    - shebanq ( $11 + 1 = 12$  of **20**) +
      - Dirk Roorda ( $11 + 1 = 12$  of **14**)
        - testOliver** (bold and italic)
        - ha** (bold)
        - Elohim Jahweh** (bold)
        - Jahweh Elohim** (bold)
        - shibboleth** (bold)
        - Shibboleth only** (bold)
        - test** (bold)
        - verbs** (bold)
        - proper names** (bold)
        - Aramaic** (bold)
        - test for Reinoud** (bold)
        - Double imperatives** (bold)
- ETCBC ( $44 + 1 + 28 = 73$ ) +
- VU Amsterdam ( $14 + 4 = 18$ ) +
- OT department Andrews University ( $168 + 62 = 230$ ) +

**Publish** if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date.

The screenshot displays the ETCBC4 interface with a query titled "Double imperatives" by Dirk Roorda. The query is active, showing 107 hits in 49 verses on 3 pages. The results are displayed in Hebrew text, with specific words highlighted in pink. Annotations include:

- hits in verse context**: Points to the highlighted words in the Hebrew text.
- enlarge preview of query in a pop-up**: Points to a "choose page" pop-up window showing a grid of page numbers (1-687).
- go to edit and execute view**: Points to the "edit" and "execute" buttons in the sidebar.
- Publish**: A note stating "Publish if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date." points to the "published" checkbox in the sidebar.

The sidebar on the left contains the following information:

- Double imperatives**: Title of the query.
- Dirk Roorda DANS shebanq**: Author and database information.
- Finding the right contexts**: A section with a description: "is a variation on Reinoud Oosting: Repetition of".
- select all objects where**: A section with a list of objects: [verse], [clause], [phrase function = Pred].
- status**: A section with a green bar indicating "results up to date".
- published**: A checkbox.
- created**: 2015-02-26 10:06:41.

- executed**: 2015-02-13 14:42:12.
- ETCBC4 feature doc**: A link to a document.
- MQL quick reference guide (pdf)**: A link to a PDF document.
- MQL Query Guide by Ulrik (pdf)**: A link to a PDF document.
- ETCBC4 transcription table (pdf)**: A link to a PDF document.

## Query developer view

Help others understand your query by writing in mark-down

after execution, results will be refreshed

**Hint:** if you want to link to an other query, you can get a valid mark-down link from the **Queries** page.

The screenshot shows the 'Query developer view' interface. At the top, there's a browser-like address bar with 'q531.csv' and a 'chart' button. Below it, the title 'Double imperatives' is displayed. A yellow arrow points from the 'Help others understand your query by writing in mark-down' callout to the main text area, which contains a markdown snippet: '# Finding the right contexts' followed by a paragraph about a variation on Reinoud Oosting's work. Below the text is a query editor with a syntax-highlighted query: 'select all objects where [verse [clause [phrase function = Pred [word AS w1 FOCUS sp = verb AND vt = impv ] ] ] [clause [phrase function = Pred [word FOCUS sp = verb AND vt = impv AND ... w1.lex ] ] ]'. At the bottom of the editor are 'Done', 'Execute', and 'Save' buttons. A yellow arrow points from the 'Edit the query body' callout to the query text. Another yellow arrow points from the 'Back to normal layout' callout to the 'Done' button. A third yellow arrow points from the 'Save and execute' callout to the 'Execute' button. A fourth yellow arrow points from the 'Just save' callout to the 'Save' button. Below the buttons, there are two green status bars: 'same query body' and 'Query executed'. At the bottom left, a 'status' section shows 'results up to date', 'published' (unchecked), 'modified' (2015-02-26 21:07:45), and 'executed' (2015-02-26 21:07:45). A yellow arrow points from the 'Watch the messages from the query engine' callout to the 'Query executed' bar. Another yellow arrow points from the 'clear messages' callout to a trash icon at the bottom right.

Double imperatives

# Finding the right contexts

This is a variation on [Reinoud Oosting: Repetition of imperative in Isa 40:1] (<http://shebanq.ancient-data.org/hebrew/text?iid=530&mr=r&qw=q>) which provides the context ``book`` for two consecutive clauses.

```
select all objects where
[verse
[clause
[phrase function = Pred
[word AS w1 FOCUS sp = verb AND vt = impv ]
]
]
[clause
[phrase function = Pred
[word FOCUS sp = verb AND vt = impv AND ... w1.lex ]
]
]

1 וַיִּכְלֹ הַשָּׁמַיִם וְהָאָרֶץ וְכָל-צָבָאם:

2 וַיִּכְלֹ אֱלֹהִים בַּיּוֹם הַשְּׂבִיעִי מְלָאכְתּוֹ אֲשֶׁר עָשָׂה וַיִּשְׁבֹּת בַּיּוֹם הַשְּׂבִיעִי מְלָאכְתּוֹ אֲשֶׁר עָשָׂה:

3 וַיְבָרֶךְ אֱלֹהִים אֶת-יוֹם הַשְּׂבִיעִי וַיְקַדֵּשׁ אֹתוֹ כִּי בּו שָׁבַת מְלָאכְתּוֹ אֲשֶׁר-בָּרָא אֱלֹהִים לַעֲשׂוֹת: פ

4 אֵל וּלְדֹת הַשָּׁמַיִם וְהָאָרֶץ בְּהִבְרָאָם בַּיּוֹם עָשׂוֹת יְהוָה אֱלֹהִים אֶרֶץ וּשְׁמַיִם:

וְהָיָה מִרְחַת יַדְּיָה רֶאֱרִיעַ וְרֶל-עֲשֹׂר הַמִּשְׁכָּה מִרְחַת יַצְמַח הִלָּ לֹא הַמִּשְׁכָּה
