**Edit** the query body

**Save and execute**

Just **save**

Back to **last saved**

Use **docs** for query writing

The screenshot shows the 'Query developer view' interface. At the top, there's a header with 'Public:' and a checked checkbox, and a 'Name:' field containing 'Proper names'. Below this is a 'Description:' field with the text 'All proper names'. The 'MQL Query' field contains the query: 'select all of ts where [word focus sp=Xnmpr]'. At the bottom of the query editor are four buttons: 'Reset', 'Save', 'Execute', and 'Done'. Below the query editor is a red error message box with the following text: '1. Symbolchecking failed with compiler error', '2. The enumeration constant Xnmpr does not exist', '3. in the enumeration of the feature.', and '4.'. At the bottom of the interface, there's a green bar with the text 'Query executed' and 'The stored query results are up to date.'.

The screenshot shows the query results for the query 'Proper names'. The results are displayed in a table with the following columns: 'Dirk Recorda: Proper names', 'Hits', 'Versions', and 'Pages'. The results are sorted by 'Hits' in descending order. The first result is 'Dirk Recorda: Proper names' with 33083 hits, 13737 versions, and 687 pages. The results are displayed in a table with the following columns: 'Dirk Recorda: Proper names', 'Hits', 'Versions', and 'Pages'. The results are sorted by 'Hits' in descending order. The first result is 'Dirk Recorda: Proper names' with 33083 hits, 13737 versions, and 687 pages. The results are displayed in a table with the following columns: 'Dirk Recorda: Proper names', 'Hits', 'Versions', and 'Pages'. The results are sorted by 'Hits' in descending order. The first result is 'Dirk Recorda: Proper names' with 33083 hits, 13737 versions, and 687 pages.

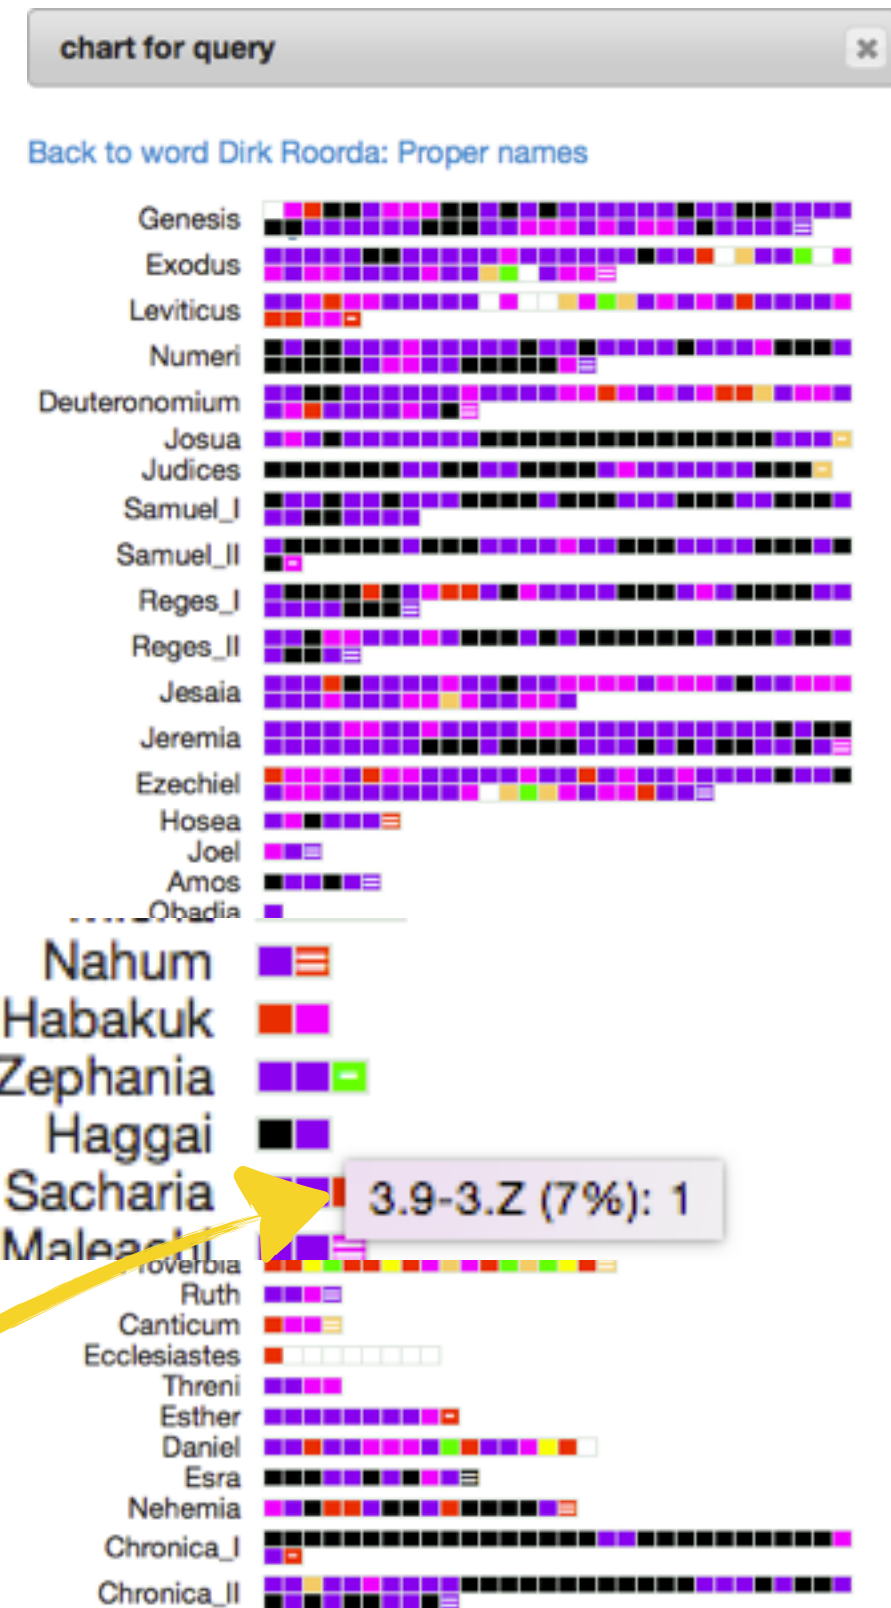

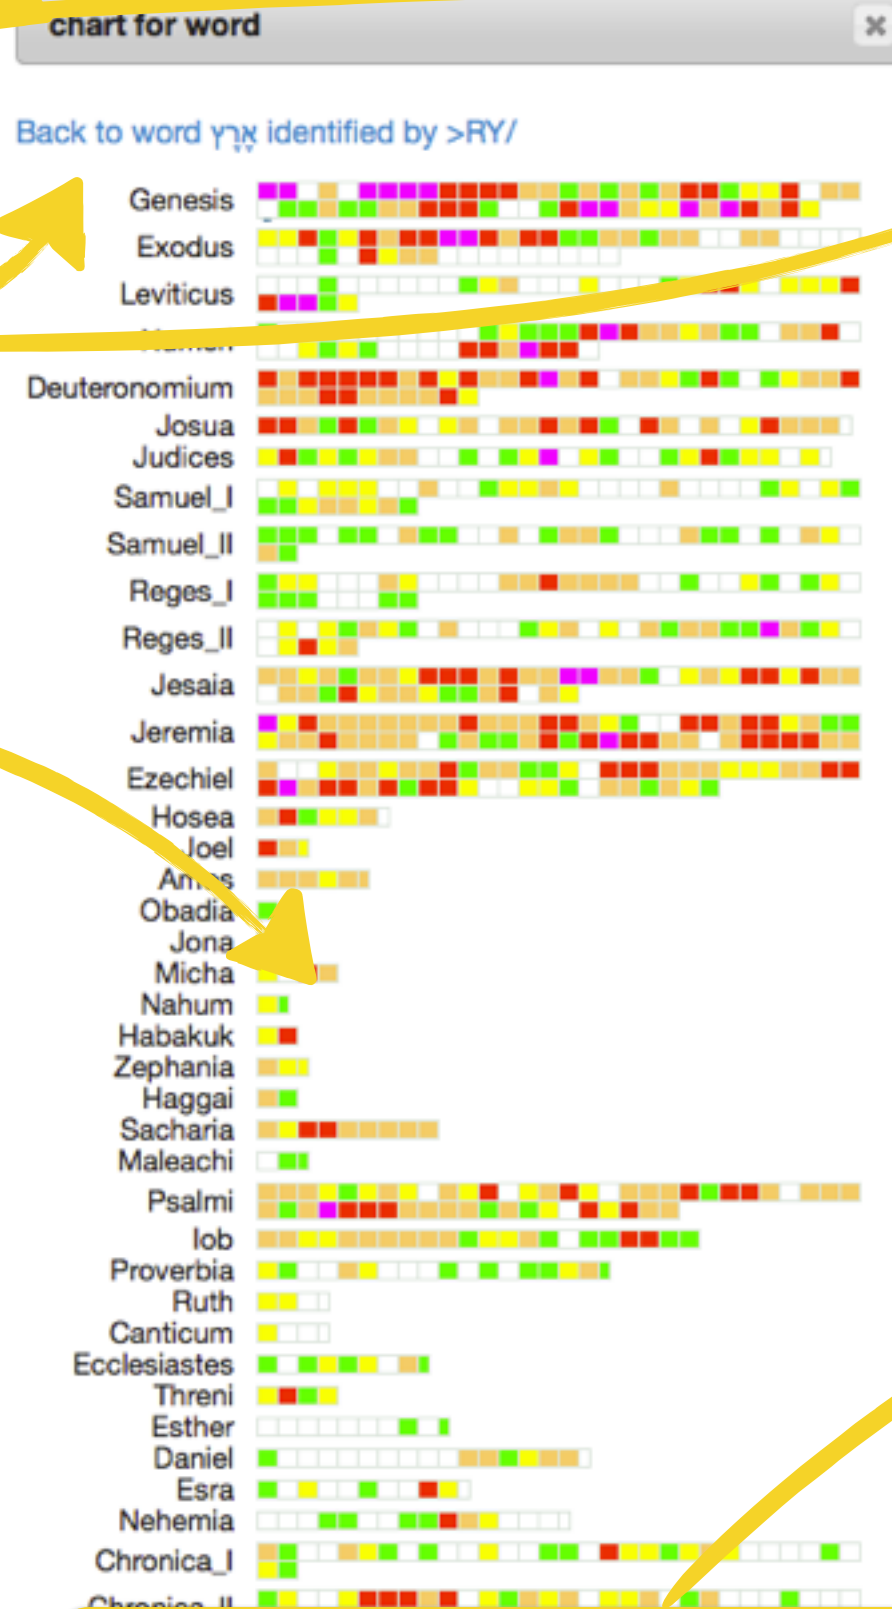

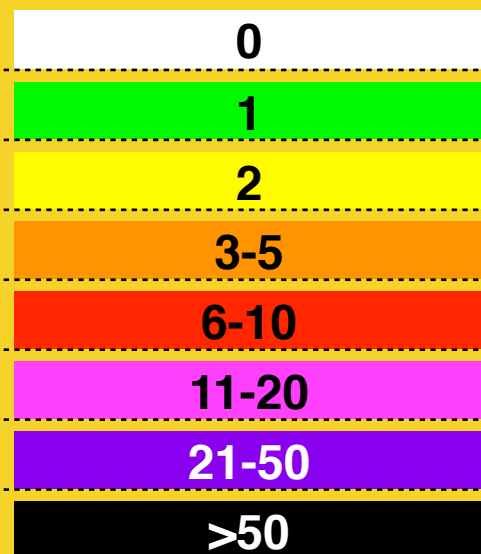

**Charts** show you where in the Bible the occurrences and hits are

**Back** to the word or query you came from

Every **cell** corresponds to a block of 500 words. Clicking it leads you to it. **Hover** to see the chapter range and the amount of hits/occurrences

The **color** in the cell indicates the *absolute* number of hits/occurrences in that chapter

**Last blocks of a book** have lesser size. The size is indicated in a tooltip (%) and the block is marked with = (< 25%) or - (between 25% and 75%)

**Chapter ranges:**  
 23.Z = chapter 23, last word  
 23.z = chapter 23, at position >95%  
 23.6 = chapter 23, at position 60%
