**Queries and muting (simple)**

click the **triangles** to expand and collapse

This is your dashboard for queries.  
Find the queries ordered by organization, then project, then user.  
Then act: preview, mute, generate a link, edit, go to the results page.

**full text search**  
on organization,  
project, people  
and queries

use *checkboxes* to **mute**  
queries, so that they do not  
show up in the sidebar

**go to** the page of this query to edit and run it

quickly expand/  
collapse the tree  
to a specific level

your mutings are not  
stored on the server but  
on your browser

**preview/edit** the description of this query  
right here by clicking the info icon

The screenshot shows the SHEBANQ web application. The top navigation bar includes links for Home, The Text, Words, Queries, Help, News, and Sources, along with a Log In button. On the left, there is a sidebar with a filter section (simple/advanced, Filter, dirk, filter applied, all with children (2), in my queries, clear filter) and a level section (Level, organizations (0 1), projects (0 2), users (2 0), queries (9), manual). The main content area displays a tree of 'Public Queries' under the 'Users' category, listing various queries like 'speak quot', 'Elohim Jahweh', 'Jahweh Elohim', 'shibboleth', 'Shibboleth only', 'verbs', 'proper names', 'Ara', and 'Double imperatives'. The 'Double imperatives' query is highlighted. On the right, the 'Double imperatives' query details are shown, including its title, author (DANS shebanq), a description in blue text, and a 'Done' button. Yellow arrows point from the text boxes to specific UI elements: from 'full text search' to the filter input; from 'quickly expand/collapse the tree' to the level selection buttons; from 'click the triangles' to the expand/collapse icons in the query tree; from 'use checkboxes to mute queries' to the checkboxes in the query tree; from 'your mutings are not stored...' to the query tree; from 'generate a pretty hyperlink' to the link icon in the query tree; from 'preview/edit the description' to the info icon in the query tree; from 'go to the page of this query' to the query title; and from 'pretty means: mark-down' to the description text.

**Finding the right contexts**

This is a variation on Reinoud Oosting: Repetition of imperative in Isa 40:1 which provides the context **book** for two consecutive clauses.

This query takes **verse** instead.

**N.B.** Use *data* view to inspect the structural difference between Jesaia 40:1 and Jesaia 51:9

Done

pretty means: *mark-down*. This description has been entered in mark-down.

## Queries and muting (advanced)

**full text search** on organization, project, people and queries. The meaning of the numbers are explained in other boxes.

without a filter, you can quickly select your own queries and your unpublished queries

# queries/matches in the levels. The **bold** number indicates real matches, the grey number indicates how many items there are with a match in its subtree

simple **advanced**

### Filter

no filter applied

### Level

organizations (10)

projects (20)

users (41)

queries (338)

**manual**

total # queries in this sub tree

**total** # queries of this organization, project or user

# of queries that are **up-to-date**, **have never run**, have **outdated results**

The screenshot shows a hierarchical tree of queries. Annotations with yellow arrows point to specific parts of the interface:

- An arrow points from the 'total # queries in this sub tree' box to the 'Public Queries' entry, which shows a calculation:  $240 + 1 + 97 = 338$ .
- An arrow points from the 'total # queries of this organization, project or user' box to the 'Public Queries' entry, which shows a calculation:  $240 + 1 + 97 = 338$ .
- An arrow points from the '# of queries that are up-to-date, have never run, have outdated results' box to the 'Public Queries' entry, which shows a calculation:  $240 + 1 + 97 = 338$ .
- An arrow points from the 'if logged in you can add/edit orgs, projects, queries here' box to the 'testOliver' entry, which is marked with a gear icon and a lock icon.
- An arrow points from the 'my queries are bold, and if they are private they are italic too' box to the 'testOliver' entry, which is marked with a gear icon and a lock icon.

The tree structure is as follows:

- Public Queries (240+1+97=338) +
  - Projects without Query (=0) +
  - DANS(13+1=14) +
    - Test Projects(2+1=3) +
    - shebanq(11+1=12 of 20) +
      - Dirk Roorda(11+1=12 of 14)
        - testOliver (gear icon, lock icon)
        - ha (gear icon, lock icon)
        - Elohim Jahweh (gear icon, lock icon)
        - Jahweh Elohim (gear icon, lock icon)
        - shibboleth (gear icon, lock icon)
        - Shibboleth only (gear icon, lock icon)
        - test (gear icon, lock icon)
        - verbs (gear icon, lock icon)
        - proper names (gear icon, lock icon)
        - Aramaic (gear icon, lock icon)

**Publish** if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date.

The screenshot displays the MQL (Machine Query Language) interface. On the left, a sidebar shows the query 'q531.csv' with a 'chart' button. Below the query name, there's a description: 'Double imperatives' by Dirk Roorda, with a link to 'DANS shebanq'. Further down, it says 'Finding the right contexts' and provides a description: 'This is a variation on Reinoud ...'. A 'select all objects where' section contains a query snippet: '[verse [clause [phrase function = Pred]'. The sidebar also shows the query's status as 'results up to date', its creation and modification dates, and a list of documentation links: 'ETCBC4 feature doc', 'MQL quick reference guide (pdf)', 'MQL Query Guide by Ulrik (pdf)', and 'ETCBC4 transcription table (pdf)'. The main view shows the query results in Hebrew text, with highlighted words. A 'choose page' dialog is open, showing a grid of page numbers from 1 to 687. The bottom section of the interface contains a 'Publish' button and a note: 'Publish if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date.'

## Query developer view

Help others understand your query by writing in mark-down

after execution, results will be refreshed

**Hint:** if you want to link to an other query, you can get a valid mark-down link from the **Queries** page.

The screenshot shows the 'Query developer view' interface. At the top, there's a title bar with a tab labeled 'q531.csv chart'. Below it, the main content area is titled 'Double imperatives'. A yellow arrow points from the 'Help others understand your query by writing in mark-down' callout to the text area. The text area contains a markdown link: '# Finding the right contexts' followed by a paragraph: 'This is a variation on [Reinoud Oosting: Repetition of imperative in Isa 40:1] (http://shebanq.ancient-data.org/hebrew/text?iid=530&mr=r&qw=q) which provides the context "book" for two consecutive clauses.' Below the text area is a code editor with a query body. A yellow arrow points from the 'Edit the query body' callout to the code editor. The code editor contains a query body with two clauses. Below the code editor are three buttons: 'Done', 'Execute', and 'Save'. A yellow arrow points from the 'Back to normal layout' callout to the 'Done' button. A yellow arrow points from the 'Save and execute' callout to the 'Execute' button. A yellow arrow points from the 'Just save' callout to the 'Save' button. Below the buttons are two status bars: 'same query body' and 'Query executed'. A yellow arrow points from the 'Watch the messages from the query engine' callout to the 'Query executed' status bar. At the bottom left, there's a status section with 'status' set to 'results up to date', 'published' checkbox, 'modified' timestamp '2015-02-26 21:07:45', and 'executed' timestamp '2015-02-26 21:07:45'. A yellow arrow points from the 'clear messages' callout to the status section.
