The screenshot shows the SHEBANQ website interface. The navigation bar includes 'SHEBANQ', 'Home', 'The Text', 'Words', 'Queries', and 'Help'. The 'Queries' dropdown menu is open, showing 'My Queries' and 'Public Queries'. Below the menu is a search bar and a table of queries. The table has columns: 'View', 'Id', 'Name', 'Modified By', and 'Created On'. The first row is highlighted in blue. Arrows from the callout boxes point to specific elements: 'Show the queries' points to the 'Queries' menu; 'if you are logged in, you can go to My Queries' points to the 'My Queries' option; 'Public Queries are the work of you and other users' points to the 'Public Queries' option; 'click the headers to sort the list' points to the 'Name' header; and 'click an entry to view more info, including the hits of this query' points to the first entry in the table.

You must be logged in to add, modify, run and publish queries.

Query developer view

Publish if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date.

Back to **normal layout**

Watch the **error messages** from the query engine

Query results will be updated after succesful execution. In that case you will see this instead.

Help others understand your query

Edit the query body

Save and execute

Just **save**

Back to **last saved**

Use **docs** for query writing

The screenshot shows the query developer interface. At the top, there's a header with 'q27.csv' and 'chart' tabs. Below it, a 'Public:' checkbox is checked. The 'Name:' field contains 'Proper names'. The 'Description:' field contains 'All proper names'. The 'MQL Query:' field contains 'select all of ts where [word focus sp=Xnmpr]'. At the bottom, there are buttons for 'Reset', 'Save', 'Execute', and 'Done'. Below the buttons, a red error message box is displayed with the following text:

1. Symbolchecking failed with compiler error
2. The enumeration constant Xnmpr does not exist
3. in the enumeration of the feature.
- 4.

Below the error message, there's a green bar with the text 'Query executed' and 'The stored query results are up to date.'.

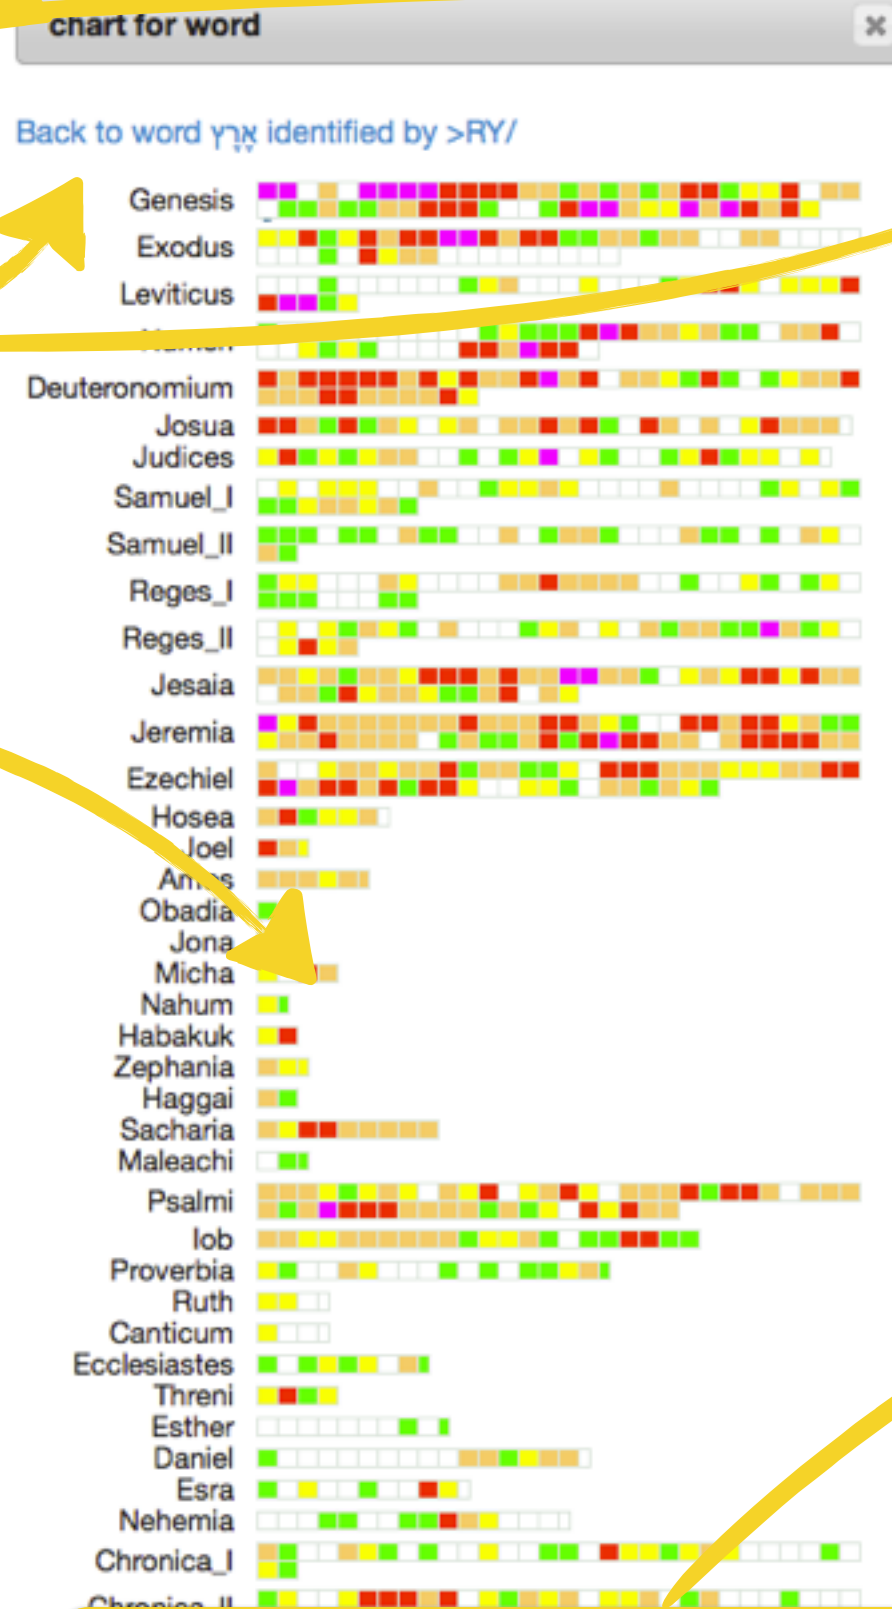

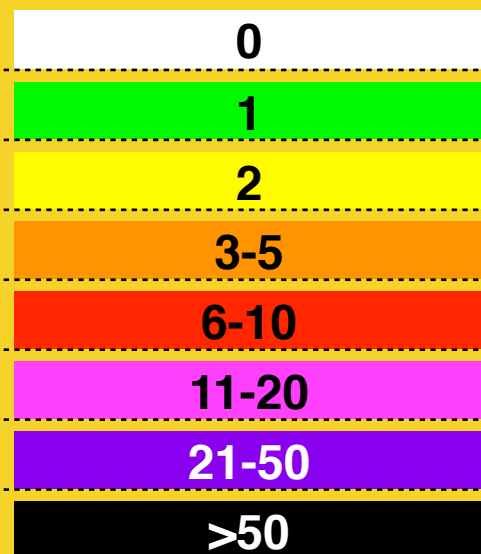

The screenshot shows the query results page. The title is 'Dirk Rorda: Proper names' with a '+ 2' icon and a 'text data' button. Below the title, it says '33083 hits in 13737 verses on 687 pages'. The results are displayed in a list of verses with proper names highlighted in pink. The verses are from Genesis 3:20, 3:21, 3:22, 3:23, and 3:24. The highlighted names are 'תָּוָה', 'יְהוָה', 'יְהוָה', 'יְהוָה', and 'יְהוָה'.

Charts show you where in the Bible the occurrences and hits are

Back to the word or query you came from

Every **cell** corresponds to a block of 500 words. Clicking it leads you to it. **Hover** to see the chapter range and the amount of hits/occurrences

The **color** in the cell indicates the *absolute* number of hits/occurrences in that chapter

Last blocks of a book have lesser size. The size is indicated in a tooltip (%) and the block is marked with = (< 25%) or - (between 25% and 75%)

Chapter ranges:
 23.Z = chapter 23, last word
 23.z = chapter 23, at position >95%
 23.6 = chapter 23, at position 60%
