### Double imperatives

Description:

#### Finding the right context

This is a variation on Reinoud Oosting: Repetition of imperative in Isa 40:1 which provides the context **book** for two consecutive clauses.

This query takes **verse** instead.

**N.B.** Use *data* view to inspect the structural difference between Jesaia 40:1 and Jesaia 51:9

**SQL Query:**

```
select all objects where
[verse
[clause
[phrase function = Pred
[word AS w1 FOCUS sp =
verb AND vt = impv ]
```

Edit query

**Project:**  
shebanq

**Organization:**  
DANS Edit info

**created:**  
2015-02-12 23:47:47

Query developer view

Watch the **error messages** from the query engine

Query results will be updated after successful execution. In that case you will see this instead.

**Publish** if you are content with the query. Public queries show up in the sidebar, if the results are up-to-date.

Help others understand your query by writing in mark-down

**Edit** the query body

Use **docs** for query writing

The screenshot shows the Query Developer View interface. At the top, there's a header with a checkmark, a red square, and labels 'q531.csv' and 'chart'. Below this, a red box contains error messages: '1. Symbolchecking failed with compiler error', '2. The enumeration constant Ximpv does not exist', '3. in the enumeration of the feature.', and '4.'. Below the errors, a message says 'The stored query results are outdated.' To the right, a green box says 'Query executed' and 'The stored query results are up to date.' Below these, there's a 'Public:' checkbox, a 'Name:' field with 'Double imperatives', and a 'Description:' field with markdown text: '# Finding the right context', 'This is a variation on [Reinoud Oosting: Repetition of imperative in Isa 40:1] (http://shebanq.ancient-data.org/hebrew/text?lid=530&mr=r&qw=q) which provides the context "hook" for two consecutive clauses.', and an 'MQL Query:' field with the query: 'select all objects where', 'verse', '[clause', '[phrase function = verb', '[word AS w1 FOCUS sp = verb AND vt = Ximpv ]', ']', '[clause'. At the bottom, there are buttons: 'Reset', 'Save', 'Execute', and 'Done'. Below the buttons, there are links: 'ETCBC4 transcription table (pdf)', 'MQL quick reference guide (pdf)', 'MQL Query Guide by Ulrik (pdf)', and 'ETCBC4 transcription table (pdf)'.
